About

Systems Administrator Intern, then full-time Partner Relations Coordinator and Account Manager, both at a HIPAA and CLIA regulated diagnostics lab.

I managed access controls in KOLIMS and wrote IT procedures nobody had documented yet. Full-time, I ran partner accounts and built onboarding processes where none existed. I designed the company's website and Document Center from scratch, then automated the manual admin work with Google Apps Script and AI tooling. Some partners still call me when something's off.

Studied finance at West Chester first, made Dean's List in fall 2024, then transferred into MIS at Temple's Fox School of Business, degree on track for May 2027. Picked up a Bloomberg Market Concepts certificate along the way.

Temple's MIS program centers on cloud computing, cybersecurity, agile methodologies, UX design, and data analytics. I've put pieces of it to work at RSM Diagnostics Lab. I built the company's website from scratch and automated the manual admin work behind it with Google Apps Script and AI tooling. I also ran LIMS administration under HIPAA and CLIA compliance.

Bachelor's, Finance
West Chester University of Pennsylvania
August 2023-May 2025

Completed coursework toward a B.S. in Finance before transferring to Temple University's Fox School of Business, Fall 2025.
